

DT Careers

1. Careers

Studying Design & Technology helps to develop the following skills: designing, product development, evaluation, production/manufacturing, costing, independence and time management and teamwork. It can lead to sixth form and college courses such as Product Design, Fashion & Textiles, Engineering and Construction. University courses such as Aeronautical Engineering, Architecture, Product Design, Fashion, Textiles, Graphics and more. It can also lead to apprenticeships in industries such as film, theatre and TV, fashion retail, production or management. Current employment opportunities where a qualification in Design and Technology would be advantageous include teaching, civil engineering, fashion marketing, graphic design, mechanical engineering and pattern cutting.
