

Unit 1- SECTION A: The Challenge of Natural Hazards – Tectonic Hazards

TECTONIC HAZARDS	AT THE START OF THE TOPIC			AFTER THE TOPIC			PLACES TO FIND HELP
							CGP Revision Guide & Textbook
Using examples describe a range of primary and secondary effects of a tectonic hazard							CGP: Page 5-6 Textbook: 14-15
Define immediate and long-term responses							CGP: Page 5-6 Textbook: 16-17
Using examples describe a range of immediate and long-term responses of a tectonic hazard							CGP: Page 5-6 Textbook: 16-17
Using named examples explain how the effects and responses to a tectonic hazard are different between a rich country and a poor country							Textbook: 16-17
KEY IDEA: management can reduce the effects of a tectonic hazard							
Explain why people chose to live in areas of tectonic activity							CGP: Page 8 Textbook: 18-19
Explain how monitoring, prediction, protection and planning can be used to reduce the risk from a							CGP: Page 8 Textbook: 20-21
Evaluate how much risk from tectonic hazards can really be reduced							CGP: Page 8 Textbook: 20-21
